Peres Eases Opposition To U.S.-Arab Peace Talks

JERUSALEM — Prime Minister Shimon Peres of Israel has dropped his opposition to preliminary Middle East peace talks between the United States and an Arab delegation that would ex-clude Israel, his spokesman said

The spokesman, Baruch Askerov, said that Mr. Peres would approve of such a meeting on the condition that direct Arab-Israeli talks followed.

Israel and the United States initially rejected a proposal last month by President Hosni Mubarak of Egypt that the Reagan administration negotiate with a Jordanian-Palestinian delegation.

"The idea of a preliminary meeting is not our first choice," Mr. Askerov said. "We prefer direct negotiations, but we can accept the principle of it if it is linked to a meeting with Israel."

The statement was the strongest

signal yet that Israel would support Mr. Muberak's peace efforts. The U.S. State Department said Monday it was considering the possibility of talking with a Jordanian-Palestinian team without the Palestine Liberation Organization if that led to direct talks with Israel.

An official source said that Israel might accept Palestinians in the Jordanian delegation if they were not known members of the PLO.

"We make a point of saying no PLO, but we have never said no Palestinians," one source said. "We don't want to close off any opportunities but we also don't want to how many people they have lost," a talk out loud about sensitive sub-

Israel and the United States reject contact with the PLO until it renounces violence and recognizes Israel's right to exist.

Mr. Peres's aides said that such objections still held but that he did not want to reject the idea of a preliminary session if it could bring Bhopal Leak

The newspaper Ha'aretz said that Mr. Peres had told Washington he consented to such a meeting and was awaiting Jordan's response. Jordan insists that the PLO, which it has recognized as the sole legitimate representative of the Palestmians, must be included in

Mr. Peres welcomed talks this week in Baghdad among the leaders of what he called the "more moderate" Arab bloc of Egypt, Jordan and Iraq, United Press International reported from Jerusalem.

"I hope that not only will such a bloc be established, but that it will also basically confirm Egypt's policy in the direction of peace." Peres said on television Thesday. As compared with what he called

Report Sees Sabotage in

DANBURY, Connecticut -The chairman of Union Carbide Corp., Warren M. Anderson, said Wednesday that sabotage could not be ruled out in the huge gas leak at the company's plant in Bho-pal, India, that killed more than 2,000 people in December.

Amouncing the findings of the company's investigation into the tragedy, he said it was unlikely that the primary cause of the leak water introduced into a storage tank containing a dangerous chemical - was an accident.

Mr. Anderson said the amount of water in the tank, estimated at about 120 to 240 gallons (about 450 to 900 liters), "would have taken 15 to 20 minutes to get there."

But he added that even if sabotage had occurred, a runaway chemical reaction could have been controlled had not the plant management deliberately ignored standard safety and operating proce-

Mr. Anderson said the plant was in such a state that it should not have been operating Dec. 3 when 41 tons of deadly methyl isocyanate gas leaked from the tank and

spread over Bhopal The leak also injured 200,000

Mr. Anderson blamed the plant's operators for the leak. Six members of Union Carbide, Ltd., India, who worked at the plant are facing criminal negli-

gence charges.
Union Carbide is being sued for billions of dollars in connection

The company report will to be given to the U.S. Environmental Protection Agency and to state agencies investigating safety at Union Carbide's Institute, West

Virginia, plant. The agency and Congress have been critical of Union Carbide's record-keeping on the release of less dangerous gas at its Institute plant, especially after people in a shopping center were overcome by

Mr. Anderson said India's Central Bureau of Investigation and the state of Madhya Pradesh in which Bhopal is located will issue their own reports.

fumes from another plant.

(Reuters, AP)

senior official said, "but it is in the tens of thousands, we think." Administration officials said

they based their assessment on several factors: intelligence gathered by Western countries, presumably through various electronic means; reports from Western observers, including journalists, who visited the battle area in recent days; close analysis of statements made by Iraq and Iran, and information gleaned by U.S. and other Western diplomats in Baghdad and by Western diplomats in Tehran, where there is no U.S. mission.

As recently as Monday, U.S. officials were saying that the fighting was indecisive, but on Tuesday, senior officials were firm in asserting that they had no doubt that the Iraqis had decisively defeated the Iranians in the latest conflict.

In what administration officials regard as a desperation move, the Iranians also launched a few Soviet-made surface-to-surface missiles against Baghdad, the Iraqi capital, and at least two were believed to have exploded in the city. The missiles, known as Scuds, date from the 1950s. They are cumbersome battlefield weapons fired from a tractor-like vehicle and are very inaccurate at the 150-mile distance

from Iran's frontier to Baghdad. The missile has been supplied to Warsaw Pact nations and to Egypt, Syria, Libya and Iraq. It can carry both nuclear and conventions warheads, but the Soviet Union is not known to have ever allowed its U.S. intelligence officials assume

nuclear weapons out of its control. that Libya sold the missiles to Iran. one official said. "The question we're all looking

at," one senior official said, "is whether the size of the defeat will finally convince Khomeini to end the war." He added that there had been no sign from Tehran that the Iranian leader, Ayatollah Ruhollah Khomeini, was ready to seek a negotiated peace.

U.S. analysts say the Iranians, who had been building up for the offensive for months, attacked through the Huwaizah marshes. The thrust of the assault came from the east of Al Amarah and Al Qurnah, towns on the Tigris River north of Basra. The Basra to Baghdad highway, a militarily significant north-south road, also goes through those towns.

U.S. officials say the Iranian Army intended to cut the road and isolate Basra to the south. That would have been a major victory for the Iranians, who apparently hoped it would break the Iragi resolve and lead to the resignation of President Saddam Hussein. Iran has made his removal a condition

In the mitial phase of the latest attack, March 11 to 14, the Iranians were believed to have fought their way to the eastern banks of the Tigris, and in some places actually crossed it and set up positions at the road.

U.S. analysts said the Iraqis, who had been expecting the attack, had built up a well-entrenched defense with artillery and tanks and used Soviet-made helicopter gunships and fighter planes effectively.

Another official said the battle

'was a classic example" of a welltrained and well-supplied army prevailing over thousands of infantry troops lacking artillery and air support. He said the Iraqi defense was patterned on Soviet tactics,

supercially, it has proved to be a disaster for the by that built it, the Japan Railways Construction ie Corporation, and for the bureaucratic cousin

that will use it, Japan National Railways. "White elephant" has become a favorite newspaper term. When work began in 1964, Japan's economy was leapfrogging ahead and anything seemed possible. Now, for the national railroad, almost everything cems implausible.

Early plans called for high-speed "bullet trains" to run on tunnel tracks, creating a direct route from Tokyo to Sapporo, the capital of Hokkaido. For sparsely populated, somewhat neglected Hokkaido, the psychological benefits were almost as important as the economic. We've been forced into isolation in terms of education, culture and economy," said Hiroshi Kawata, president of the Chamber of Commerce and Industry

in Hakodate, the largest Hokkaido city near the tunnel. "The Tsugaru Strait has been a great wall separat-ing us from the rest of the country. This tunnel breaks through the wall." By rail, the trip from Tokyo to Sapporo takes more than 16 hours, including a four-and-a-half-hour ferry trip across the strait to Hakodate from Aomori, on shu. That is, if the ferry is running. Rough weather forces shutdowns an average of 80 days a year, the

operators not being eager for a repetition of a 1954 accident in which more than 1,100 people drowned. The bullet train was seen as an obvious solution cutting travel time by 70 percent, but the idea had to be set aside during the oil crises of the 1970's. In the meantime, the national railroads became a textbook case of poor management.

The tunnel aside, the railroad loses money at the rate of \$1 million every hour, and the completed (Continued on Page 4, Col. 7)

HANOI (WP) — Vietnam turned over Wednesday to U.S. officials the remains of five persons believed to be U.S. servicemen missing in action during the Vietnam War.

The remains were handed over at Hanoi's Gia Lam Airport to a U. team led by Colonel Joe Harvey, the head of the Joint Casualty Resolition Center based in Hawaii. The remains are to be flown to Hawaii fe

There are indications that Vietnam wants to improve ties with the United States and hopes that the 10th anniversary of the Common victory over South Victnam next month will mark a new chapter relations between the two countries. However, a U.S. request to partic pate in the excavation of U.S. warplane crash sites in Vietnam has between down, Foreign Minister Nguyen Co Thach said Tuesday.

Perle Takes Issue With Britain's How

LONDON (AP) — Richard N. Perle, the U.S. assistant secretary to defense, has taken sharp issue with a speech by the British foreign secretary. Sir Geoffrey Howe, that questioned the wisdom of the U. Strategic Defense Initiative.

Mr. Perle on Tuesday described Sir Geoffrey's criticism as tendentically and the strategic Defense in the secretary of the secretary

and contended that he had "succeeded in rewriting the recent history the Soviet-American strategic relationship, rendering it unrecognizable

anyone who has charted its course."

Mr. Perle caustically summed up Sir Geoffrey's speech Friday to the Royal United Services Institute by saying, "It was a speech that prove again an old axiom of geometry, that length is no substitute for depth Sir Geoffrey posed 22 questions about President Ronald Reagan research progress which seeks to to determine if deployment of a space research program, which seeks to to determine if deployment of a space based military shield against incoming Soviet missiles is possible.

Vatican Assails Liberation Theologian

VATICAN CITY (UPI) - The Vatican accused the Reverend Leona do Boff, the Brazilian liberation theologian, on Wednesday of "a profound misunderstanding" of Catholicism and said that his opinion "endanger the sound doctrine of the faith."

Cardinal Joseph Ratzinger, German prefect of the Sacred Congregation for the Doctrine of the Faith, made the charges in an 11-pa; "notification" on Father Boff's book, "Church: Charism and Power." Pope John Paul II personally approved the judgment, Cardinal Razinger said. It made no mention of disciplinary action against the 46-yea old Franciscan priest, who personally defended his book at a "brother!" meeting with the cardinal at the Vatican on Sept. 7. "This is just theological and moral judgment on the book. No disciplinary action

President Daniel Ortega Saavedra perhaps expressed the policy be rebels have not been able to most blumtly during the election campaign last fall when he said, "We want to talk with the owner of the circus, not the acrobats."

Among the opposition, opinions are divided on the effect the rebels have had on Sandinist policy. One popular school of thought argues that the war has prevented the Sandinists from carrying out the radical plans they originally had and has forced them to present a "pluralist" image to the rest of the world in return for aid.

"Maybe U.S. support for the armed groups has actually helped us." said Eduardo Rivas Gasteazoro, president of the Democratic Coordinator, the main coalition of opposition political and labor groups. "We are not in favor of the armed struggle, but if it did not exist, perhaps the government would have already done away with

the opposition." But the opposition also believes the Sandinists are using the war with the rebels for their own political advantage. The Sandinists, Mr. Rivas said, have seized on the existence of the rebels to "discredit and intimidate" the legal opposition.

Thus La Prensa has been dubbed La PrenCIA and the Roman Catholic bishops and the Coordinator them less likely than ever to com-are accused of "playing the CIA's promise with their domestic oppo-

been using the war as a "pretext" according to U.S. Embassy estifor violations of constitutional mates. Virtually the entire Nicaraguarantees. But with or without the rebels and their U.S. support, he said, the Sandinists will always have a motivation" for restricting civil liberties.

Those restrictions, according to Mr. Hernández, include press censorship and limitations on freedom of assembly taken in the name of national security. In addition, he said, more than 800 peasants have been tried on charges of aiding or collaborating with the rebels by "anti-Somoza popular tribunals" in which "there are no legal guaran-

Most Nicaraguan opposition leaders and journalists, as well as most foreign diplomats in Managua, tend to agree that the rebel threat has stiffened the resolve of the Sandinist leaders and made

> countries has declined from the record high registered in 1981, the

guan banana crop is sold in the United States and large amounts of can market.

Opposition economists argue that the economic crisis is primarily incompetence as managers. But they agree that the war has made the situation more acute.

The most severe economic dam age has been to the coffee crop, which is Nicaragua's chief foreign-exchange earner. Rebel attacks on cooperatives and coffee pickers during the recent harvest were instrumental in reducing this year's crop, which has been officially esti-mated at about 110 million pounds (50 million kilograms) but which industry sources say may actually be as little as 80 million pounds.

Other crops grown primarily in areas not affected by the fighting such as cotton, sugar, beans and corn, also have been affected, although indirectly.

Many young men who ordinarily would be picking the crops have been drafted into the army and sent off to war zones. But according to farmers and ranchers, thousands more have gone into hiding to avoid the draft, adding to the manpower problem.

Industry has been affected, too. This month a plywood factory in Managua said it was closing because it no longer had reliable small years. cause it no longer had reliable supplies of wood, which had been coming from northern areas where Although trade between the two some of the heaviest fighting has been taking place.

"It seems as if the contras' object United States remains Nicaragua's tive is to bleed the economy dry," To Lino Hernandez of the Perleading trade partner, supplying said a European diplomat of the the first black woman elected to the nament Commission for Human about 20 percent of its imports and guerrillas. CIA Proposes a Law to Make Disclosing U.S. Secrets a Crime

By Smart Taylor Jr.

WASHINGTON — The Central Intelligence Agency has proposed to the White House that legislation be sought that would make it a crime for government employees to disclose national secrets without authorization, Reagan administration officials said.

The proposed legislation would authorize prosecution of government employees or former employ-ees who "willfully" disclose "any classified information," with certain narrow exceptions, to reporters or others outside the govern-

The maximum penalty would be five years in prison and a \$25,000 fine, the officials said Tuesday.

Although the Justice Department takes the position that such disclosures already violate criminal laws barring espionage and theft of government property, that inter-

Adopting the Reagan adminis-tration's position, Chief Justice Burger overturned a U.S. appeals court ruling that dismissed the marijuana smuggling convictions of two North Carolina men because they were held in custody for 20 minutes without being arrested.

In another case, the court allowed continued use of lethal injections in executions, ruling unani-mously that the Food and Drug Administration is not required to ensure the injections do not produce a slow and painful death.

WHAT WOULD LIFE BE LIKE WITHOUT IT? WEEKEND EACH FRIDAY IN THE IHT

fense and other departments. No decision has been made whether to send it to Congress, according to Kathy Pherson, a CIA spokes-

loyees are crimes. woman, said the proposal, a copy
The proposal does not appear to of which was obtained by The New York Times, had been designated secret by the agency on the ground that its disclosure while it is still disclosed to them. However, it being discussed would be "inappropriate" and "premature."

George Lauder, chief spokesman for the agency, declined to confirm whether the proposal had been classified or to discuss whether its disclosure would be considered a crime under the proposed legisla-

administration has taken or considered to combat disclosures, including a presidential order, later cut back somewhat, that provided for lifelong censorship of persons who have held certain official positions and greater use of polygraph ma-chines, or lie detectors, to trace the source of disclosures.

Most of those measures, like the new proposal, have been aimed primarily at officials who make disclosures rather than the journalists who publish them.

pretrial ruling last week from Judge Joseph H. Young of the federal district court in Baltimore that it was a crime for officials to give military secrets to reporters or oth-

Rejecting a motion to dismiss a criminal prosecution, Judge Young adopted the Justice Department's view that such disclosures violate the general, broadly worded criminal laws barring espionage and theft of government property.

That interpretation has long been disputed by civil libertarians, journalists and others who say Congress intended the espionage laws to apply only to foreign spies, not to disclosures to reporters. The issue has never been squarely considered by an appellate court.

Lawyers for Samuel Loring Morcase, say he will appeal the judge's ruling if convicted at his trial, set to begin July 15. He is charged under the espionage and theft laws with giving secret intelligence photoeraphs to a British military maga-

was escorted on Wednesday to the Taipei District Court, where he faces charges of murdering Henry Lin, a Chinese-American journalist, in Daly City, California, on Oct. 15. Mr. Liu said in court that Vice Admiral Wong Shi-ling, former director of military intelligence, ordered the slaying, asserting that Mr. Liu was a spy.

Japanese Tunnel Proves the publish them. The Justice Department won a A Costly Accomplishment

(Continued from Page 1) Seikan Tunnel will only expand the deficit. Construction is about a decade behind schedule, the \$2.8-billion price tag is more than three times the original estimate and reg-ular train service to Hokkaido, expected to begin in 1988, is a sure

money loser. Domestic air travel in Japan has laying track and electrical lines grown spectacularly, with twothirds of the 12 million passengers who travel between Honshu and Hokkaido annually taking planes. The railroad estimated this month that 2.1 million passengers a year and 3.4 million tons of freight would be carried through the Seikan Tunnel - roughly one-fifth the volume forecast 15 years ago.

Soviet's Managers, Workers, Told of Need for Discipline

MOSCOW — Soviet officials. d Wednesday to take a new look diheir attitudes to work and to pare for a decisive turn to a licy of intensive development. in editorial in Pravda, the Com-

nist Party newspaper, repeated-referred to the need for "disci-ne," indicating that the word is be as firm a slogan under Mikil S. Gorbachev, the new leader, it was under Yuri V. Andropov. "Strengthening of organization, ler and discipline in all spheres production and management." lvda said. "is of ever-growing portance for the decisive turn of economy on to the path of

ensive development. Mr. Gorbachev took power last ek on the death of President instantin U. Chemenko, whose month rule has been seen widely a stopgap period between his decessor, Andropov, and Anpov's protege, Mr. Gorbachev.
The Pravda editorial quoted Mr.
The Pravda editorial quoted Mr.
The Pravda editorial quoted mr. or discipline in his first speech or discipulie in the past winter party leader. The past winter bwed signs of an economic

wnturn that had to be halted, the torial said. Economic figures for the first o months of this year revealed a ious decline in the rate of growth

Soviet industrial production and or productivity. Pravda cited poor planning as an umple of bad labor discipline 1 criticized the energy, transport

i metallurgy sectors for failing

meet many of their planned tar-The editorial also attacked min-

istries, which in the Soviet economy act as central management for individual production sectors, for trying to get the maximum possible investment and lowest possible production targets in the next five-year plan.

"To successfully meet targets for this year and the whole five-year plan." Pravda said, "party, local council, trade union and Communist youth organizations need to take a new look at the organization of Socialist competition.

"Socialist competition" is the official term used to encourage fac-tories to vie with each other in output in the absence of the capitalist profit motive and its conse-

Under the terms of an economic experiment launched under Andropov and thought to have Mr. Gorbachev's personal backing, some factories are being allowed more autonomy over use of funds.

This means they can give top workers higher bonuses. Also, factories that improve production figares will be allocated more funds while those that do not meet targets may find less money at their dis-

Pravda compared results at two metal plants in the Urals. Despite the fact that both had faced power cuts and other difficulties cause by the cold winter, one had increased production by 6.4 percent while the other had failed to meet all targets. Also singled out for criticism was

s major timber plant at Ust-Ilimsk in Siberia. Pravda said the plant, built to soak up surplus power from a vast but underused hydroelectric station, had failed to meet targets in January and February.

EASTER OFFERING — Pope John Paul II received an imposing chocolate egg from a delegation of visitors during his weekly general audience at the Vatican on Wednesday.

France to Double Nuclear Warheads on Subs

LONDON - France will more than double the number of nuclear warheads aboard its submarines this year and will have nearly 500 submarine-based warheads by 1992, according to Charles Hernu, the French defense minister

There will be 176 warheads in the French submarine force by the end of this year compared to 80 at the end of 1984, Mr. Hernu said in an interview published Tuesday in

Jane's Defense Weekly.
France's sixth nuclear-armed

submarine, L'Inflexible, will go into service this year, he said. It will be equipped with the M-4 missile, which carries six warheads, each with a yield of six kilotons. One kiloton has the explosive force of

1,000 tons of TNT. The other five submarines also will receive M-4 missiles, bringing the total number of warheads in France's undersea force to "almost 500 by 1992," Mr. Hernu said. French air and ground nuclear forces also will be updated, he add-

Increased European military strength "can only contribute to forging closer contacts among Eupeans," he said.

Mr. Hernu said trade in military equipment between Europe and the United States is "very strongly" weighted in favor of the United

Greater "aggressiveness" by French executives and the development of unique European weaponry are belping to balance the equa-tion, he said.

JERUSALEM - If the Volunteers for Israel program had travel brochures, they might read, "Come to Israel, meet the people, see the land and learn how to repair the engine of a Patton tank or wash dishes for 1,000 soldiers."

Since its inception in early 1983, Volunteers for Israel has allowed about 3,600 foreigners - most of them Americans, 18 to 65 years old —to spend a month or more working on an Israeli Army base per-forming noncombat duties. It is not everyone's idea of a vacation, but to hear some volunteers tell it, it

beats seeing Israel from a tour bus. Dressed in standard-issue green Israeli Army fatigues and armed with two pink rubber gloves, Shirley Benson, a gray-haired mother of three children and grandmother of five, interrupts her dishwashing efforts in the mess hall at the Emanuel army base to explain

what she is doing in Israel.
"I am a Jewish mother who left the kitchens of America for the kitchens of Israel," said Mrs. Benson, a 55-year-old resident of California, who forms part of a battal-ion of "Yiddishe Mamas," as the Israeli soldiers call them.

"America has its Peace Corps," she said. "and this is also a kind of Peace Corps. We don't teach them anything, though. We give of our-selves. I don't do it for money. I do it for the wonderful feeling I get

Mrs. Benson volunteered for a month with her husband, Ben, who is working on the same base, south of Tel Aviv, repairing the brake linings of Israeli Army jeeps.

The Volunteers for Israel pro- their own floor in a regular army gram was the brainchild of one of barracks, are integrated into all so-Israel's most distinguished combat cial activities on the base, get all the officers, Aharon Davidi, a retired food they can eat and all the Hebrew and Israeli culture they can general who headed the Israeli paratroop corps in the 1967 war. In August 1982, at the height of the

Kristin Reed of Washington, an 18-year-old convert to Judaism, stood in the tank shop at the Emanuel base with her arm swallowed up in the depths of a tank engine.

A visitor asked what she was working on.

"It's a Patton tank," she replied with authority, stretching her arm deeper into the engine.

And what was she doing?
"Right now," she said, "I'm trying to put a new screw into a very hard place. Success! I got it!"

Not all the volunteers are Jews, Monty Crisp, a 31-year-old Christian fundamentalist from South Carolina, came to Israel to work on from the United States. France, a kibbutz and an archeological dig but heard about the volunteers pro-

"Being in Israel and knowing what an integral part of society the army is," he said. "I wanted to see it from the inside."

Lately, he can be a support of the said. "I wanted to see it from the inside."

Year's First Rain Raises Hopes For Relief in Ethiopia Drought

By Clifford D. May New York Times Service

ADDIS ABABA, Ethiopia - It rained here this week. Not much, in terms of what is needed, but rain every afternoon is just what is enough to raise hopes in this needed," Mr. Chater said Tuesday. drought-tortured African country that the seasonal "short rains" which failed completely last year might have arrived.

"It's too early to say for certain," said Simon Chater of the International Livestock Center for Africa, gin planting crops including corn, an institution that keeps a keen eye sorghum and teff, the coarse grain an institution that keeps a keen eye on the weather. "But we're cau-tiously optimistic."

On Sunday, Martha Kebede and her family were having a get-together when abruptly, from abnormally darkened skies, there issued sounds to which the ears had become unaccustomed. They were accompanied by flashes of the purest

At first, the gathering ignored these intrusions, dismissing them as empty promises. They continued to talk softly, lunching on the sour bread known as injerra and sipping the sweet honey wine called tejj. But then it arrived: a cooling drizzie that evolved into a respectable

cause for celebration."

Soon, almost all of the 60 members of the family were singing and dancing in the rain, the women in Ethiopia. The country is also refusing umbrellas, preferring to let hungry, they say, as a result of their white embroidered shawls environmental abuse and agriculsoak up the precipitation, the men tural policies aimed at providing not minding that their suits were growing dark and their shoes becoming sloshy. Every clap of thun- ant farmers. der brought a burst of applause, as though an inspired performance was being staged for the entertainment of this audience alone.

Similar scenes are said to have taken place in six of Ethiopia's 14 some of the roads over which food regions, where the year's first rains trucks are now traveling are likely were continuing. By Friday, rain is to soon become impassable," Mr.

By Michael T. Kaufman New York Times Service

WARSAW - Indictments have been drawn up against three jailed Polish dissident leaders, one of whom has been on a hunger strike for more than a week, according to people close to the men.

The three - Wladyslaw Frasyniuk, Bogdan Lis and Adam Michnik — have been held without access to visitors since Feb. 13 for purportedly discussing plans for a nationwide work stoppage to pro-test price increases. They are said to face charges of urging public

According to the sources, the lawyers for the three men were called in this week to review the indictments and the record of the interrogation.

The sources said Tuesday that the authorities were seeking a speedy one-day trial just before Easter, which is April 7 this year, and that the three men, all of whom received amnesty last year, would probably receive prison sentences of two to three years.

The meeting at which they were seized had been convened in Gdansk by Lech Walesa, the leader of the outlawed Solidarity labor movement, but Mr. Walesa was not detained. The plans for the work

stoppage were later abandoned. The reported hunger strike was begun March 10 by Mr. Lis, who was once the second-ranking member of the Solidarity underground. There was a report from Solidarity

Can you find the ITT computer?

ITT European Headquarters, Avenue Louise 480, B-1050, Brussels, Belgium

You probably went straight to the ITT XTRA® Personal Computer

The picture that looks like a computer

But actually, there is a computer in each of the products shown in these pictures

shown in these pictures.

The car, for example. It's equipped with our recently introduced

ped with our recently introduced ABS anti-lock braking system. Which is controlled by an ITT computer.

Our System 12th telephone exchange and our 5200 Business Communications System are basically computers.

Even the light pen that "writes" instructions on a video screen couldn't function without a computer

The point is, ITT computer technology exists in much that we do these days.

We've identified a select number of growing businesses that we're concentrating on. And many of them involve high technology.

You may not be able to see all the changes we've made in ITT yet. But the results will be easy to spot.

It's a different world today.

Much Ado About the MX

The extraordinary thing about the MX de- exhibit in the general indictment holding that bate is that in the fifth year of an administration which won re-election on a platform of military strength, the particular weapon most symbolic of that quest for strength remains in deep political trouble — no matter that it cleared one hurdle in the Senate on Tuesday. However the votes finally come out, the president's struggle to get them tells a political tale.

Is there left a legislator who has not received a personal MX appeal from President Reagan?
The scale of his exertion falls somewhere between formidable and epic. Perhaps inadvertently, he has set a new standard of presidential commitment against which his subsequent appeals for this or that are bound to be measured. Yet his appeal has been resisted, if not altogether rebuffed, not merely by legislators of a different partisan or ideological persua-sion but also by defense-minded legislators. including some in his own party.

The upshot is that even a victory in the current series of votes will have a Pyrrhic quality. It cannot possibly produce the success at Geneva that many people will have been led to expect by the president's dire warnings of what a negative vote would bring. His campaign has taken important swing legislators to a point where they may reluctantly support MX now, chiefly because of the damage a "no" might do to the American position at the Geneva talks, but they are darned if they will vote for the 48 additional MX missiles needed

to complete the administration's MX buy.

Meanwhile, the MX has become a leading

the administration throws money at military problems without knowing what it is doing. This indictment, key legislators believe, is bound to make its mark on the administra-

tion's defense planning and spending.

It is unfair to put the entire burden of the MX on the Reagan administration. The missile was, first, a Ford and Carter project. But Mr. Reagan did not merely inherit a debatable missile program; all missile programs are debatable. He added a philosophy — build great strength and negotiate from it — that does not lend itself easily to the proportion and intelli-gence that even many of his supporters feel ought to be essential elements in security policy. Proportion and intelligence are after all the quintessential conservative virtues. The MX without "star wars" was one thing; the MX with "star wars" is — well, people want to think about it. The president's seeming indifference to a proper connection between de-fense and the deficit adds to concern.

Is there in the Reagan administration an wareness of the range and depth of reservations it has stirred on security issues, among its friends as well as its political adversaries? It does not bode well that, regarding the MX, the president felt it necessary to launch a Normandy invasion to capture such a relatively small objective. What Mr. Reagan most needs to demonstrate, and most of all to the Russians, is a command of the American political arena. Yet that seems to be where his frailty lies.

- THE WASHINGTON POST.

Federal Insurance for All

"Is my money safe?" That is the question aroused in depositors all over the United States by Ohio's temporary closing of 71 privately insured savings institutions.

The answer is an unequivocal "yes" for the reat majority — everyone with deposits up to \$100,000 in banks covered by federal insurance. Federally insured accounts are, for all practical purposes, backed by the government's power to create money. But what of the minority? What of depositors in the small number of banks that lack federal coverage and rely instead on problematical state insurance? However well managed, those institutions are vulnerable to the sort of crisis that has beset Ohio. And when it explodes, depositors must expect to bear the brunt of the shock. It would therefore serve both individual depositors and the financial system as a whole

to require federal insurance for all banks. Ohio's turmoil began with the failure of the Home State Savings Bank on March 9 after it had lost millions in the collapse of a securities broker in Fort Lauderdale, Florida. Once Home State went under, depositors at the other banks insured by the Ohio Deposit Guarantee Fund nervously began withdrawing their money. Many, perhaps all of these banks have sufficient assets to cover their liabilities to depositors. But none could raise the cash

overnight, and Governor Richard Celeste wisely chose to close them until confidence in the system is restored. But even a happy ending should serve as a warning.

Businesses go bankrupt every day. The risk of bankruptcy is indispensable to the market's efficient allocation of scarce capital. But banks are not like other businesses; if some start to fail, confidence in all banks is diminished. A modern economy cannot operate efficiently unless depositors are sure their money is safe.

Until recently one could plausibly argue that private bank insurance was sufficient to maintain confidence. But the increasing integration of the financial system - the links, for example, between a bank in Ohio and a securities broker in Florida — puts all financial institutions at greater psychological risk.

In any case, small depositors have no idea of how much risk they bear. Indeed, in a system in which most banks are federally insured, they are easily misled into assuming that all banks are equally well insured.

The remedy is for Congress to insist that all banks and thrifts get federal insurance or quit the banking business. That alone will not guarantee complete confidence in banking, but it would spare other depositors and other states from having to repeat Ohio's unhappy ordeal.

- THE NEW YORK TIMES.

Other Opinion

decision-making process precludes a sudden reversal of policy, particularly internationally. It is like a large oil tanker — even if the captain wishes to change course, and this has yet to be proven, it takes a long time to turn around. It is natural to look for rapid changes in the

Soviet attitude to nuclear weapons. Here Mr. Gorbachev will face formidable difficulties. Grigori Romanov has a reputation for being the generals' man and will watch carefully for any sign of deviation. The military leadership has become very strong and assertive.

What is needed is a personal meeting between Mr. Gorbachev and Mr. Reagan to allow some empathy to develop between them as individuals. President Reagan is going to be in Europe for the Bonn economic summit between May 2 and 4. A meeting in Vienna just prior to the 40th anniversary of V-E Day on May 8 would be the appropriate moment to start to reorder East-West relations. - David Owen, writing in The Observer (London).

Stirring Up Today's 'Balkans'

Dwight D. Eisenhower's comment to me in 1956 that the Middle East was bound to become the Balkans of the last half of this century has been abundantly supported by the events of the past several days. The war between Iran and Iraq, for months confined to isolated air attacks on shipping, has unexpect-edly moved into a high-intensity phase. The situation in Lebanon is deteriorating rapidly.

For an East-West Summit Soon There is a real connection between these two crisis areas. The most dangerous factor in the The momentum of the Soviet bureaucratic Gulf war and in Lebanon is the growth of Moslem fundamentalism. Since the end of World War II, the Middle East has been an arena of violence and a source of discord among the great powers. Now a new ingredient has been added to this witches' brew, and no one can say how far the poison will spread.

- Syndicased columnist Drew Middleton.

The Iraqi declaration that Iranian airspace. is now a war zone endangers the lives of Japanese and other foreigners staying in Iran. In the course of the war, both sides have inflicted damage on third countries through attacks on tankers, mining of the sea and polluting seawater with oil spills to further their own aims. This is not fair. It is obvious that this war is the height of human folly.

- The Daily Yomiuri (Tokyo).

No Hurry in Southern Africa

The situation in both Mozambique and Angola is that neither the government nor the rebels seem able to sway the balance in their favor unaided, yet neither side is prepared to negotiate because each thinks it is on the road to victory. Apart from a few minor economic difficulties, South Africa is not seriously disadvantaged by the chaos that has resulted, and is far less dependent on good relations with its neighbors than the other way around. Pretoria would be glad if peace could be arrived at, but if not, it can live with the alternative.

- Neue Zürcher Zeitung (Zurich).

FROM OUR MARCH 21 PAGES, 75 AND 50 YEARS AGO

1910: U.S.-Canadian Trade at Issue ALBANY, New York - President Tast and Earl Grey, governor-general of Canada, sat together [on March 19] at a banquet at the University Club. Both made speeches on the subject of friendly relations. Earl Grey said: So long as the Stars and Stripes and the Union Jack get together there will always be fair weather." Mr. Taft, referring to the tariff conference which will take place between him-self and the Canadian Minister of Finance [on March 20], said that every effort would be put forth by the United States to find a means of avoiding the creation of a tariff wall between America and Canada. He said: "It is to our great advantage to be just to Canada, and to her advantage to be just to us."

1935: Dust Storms Pall Middle West CHICAGO - One of the worst dust storms in the history of the Middle West, and the third within the week, swept over Kansas and Ne-braska [on March 20], blotting out the sun, halting traffic and forcing people to stay in-doors. Thousands of tons of dirt in fine particles were swept through the air. When the wind slackened, this settled to a depth of half an inch or more, sifted into houses and shops and crunched under foot. Wet sheets packed about doors and windows gave but slight protection against the infiltration. People in Kansas are getting used to going to bed and finding the covers weighed down with dirt in the morning. The condition prevailed from Wyoming and the Dakotas to the Texas Panhandle.

To Have Reductions In Offensive Missiles

By Jeremy J. Stone

WASHINGTON — The Rea-gan administration says it wants a "radical reduction" in of-the SDI, he said, the Soviet Union 10 years. Such reductions are increasingly admitted to be crucial to the success of the defensive weapons that the administration seeks. Many observers have concluded that talk of radical reductions is just talk, unlikely to lead to any actual diminishing of nuclear arsenals.

But the new Soviet leadership might be able to force such reductions if it played its cards properly.

The Russians clearly see the Reagan administration's Strategic De-fense Initiative as an enormous obstacle to new agreements. But what if the Soviet Union decided to try to pre-empt and preclude "star wars" deployment through an agreement on reductions of offensive weapons? For example, the Russians

fensive nuclear arms during the next will respond by adding new capabilities to its offensive arsenal. It is not surprising that a Soviet general would think the best re-

sponse to new American defensive measures is more offense to overcome them. This has been the tradi-tional approach of both superpowers, and explains why they adopted the 1972 ABM treaty. But the "star wars" defense will be a long time abuilding, and to respond to it with new offensive

and new tactics anyway. So reduc-tions of existing offensive systems could still be possible. Such a strategy is also consistent with the Soviet use of arms control to moderate U.S.-Soviet relations. might propose a program of con-tinuing, progressively deeper cuts in proach that is often feared by

come up with new kinds of weapons

apons the Russians will have to

We both believed that we might conclude a 50-percent reduction in nuclear arsenals.

offensive weapons that would continue only as long as the United States refrained from field-testing or deploying defense systems pro-hibited by the 1972 treaty banning anti-ballistic missile systems.

A well designed program of an-nual reductions of 5 percent in each side's inventory of warheads would bring substantial reductions in a relatively short time, and could politically tie up "star wars." This might be the Soviet ace in the hole. To make such a proposal the Rus-

sians would have to overcome their first instinct, which was outlined in Washington recently by General

American hawks opposing arms control on the ground that relax-ation of tension will really mean relaxation of American vigilance. On the other hand, steady reductions over a long period would be an appealing idea, bound to find many supporters in the United States, king it harder to reject.

There has been considerable sup-port in the United States for the idea of progressive, steady reduc-tions. In 1979 the Senate Foreign Relations Committee unanimously supported a resolution urging Moscow and Washington to pursue "continuous year-by-year reduc-

tions in the ceilings and subceilings under the [SALT-2] treaty so as to take advantage of the treaty already negotiated and to begin a sustain-able and effective process of reductions in strategic arms."

At the June 1979 Vienna summit, after six months of Pentagon stud-ies of the proposal, President Jimmy Carter suggested just such an agreement: a 5-percent annual shrinkage of SALT-2 limits and sub-limits for five years. As Mr. Carter reported later on his conversations with Leo-nid Brezhnev, "We both believed that we might conclude a 50-percent reduction in nuclear arsenals on both sides even below the SALT-2 levels." This would suggest that the Pentagon signed off on several years of this percentage of annual reduction of SALT-2 limits.

Shrinking SALT-2 by 50 percent would achieve most of the goals set by President Reagan in the 1982 speech in which he called for, among other things, reducing ballis-tic missile warheads to about 5,000. And while his administration called the SALT-2 treaty "fatally flawed," the principal flaw now cited is the treaty's failure to include disarmament. A proposal to shrink SALT-2 would repair that failure.

Moreover, an agreement of this kind would be easy to negotiate — it only requires agreement on a single percentage. Proposing it would give

the Russians both the moral high ground in these negotiations and a real prospect of heading off the defensive arms race that certainly worries them. Public opinion in Europe and America would surely be impressed by such an offer.

But a successful negotiation along these lines would not have to

be seen as a victory for the Russians. On the contrary, it would give President Reagan an enormous tri-umph: He could describe it as just what he intended all along — real reductions. And he could keep his "star wars" research, provided it stays in the laboratories.

If, after far-reaching reductions, the two sides were willing to accept, wanted to purchase and could figure out how to live with some kind of population defense, President

Reagan could get that, too.
Finally, for those of us who be-lieve that "star wars" puts America on absolutely the wrong road for national security, there would be pre-emptive arms control instead. As the idea of building a defense gains momentum in America, there may be no better solution for the Russians than to hold "star wars" hostage with a reduction agreement of unlimited duration.

The writer is director of the Federation of American Scientists. He contributed this to The Washington Post.

an attack is a very different matter.

through strategic defense will end up

like all other attempts in history that

sought to replace offense by defense:

If the Strategic Defense Initiative

should escape this fate, it would be

thing to believe when it happens but

favor and those against the SDI is

whether, in some distant future, de-

fenses against ballistic missiles could

really constrain a determined enemy

attack. That remains to be seen. In

the meantime, as Paul Nitze, special

adviser on arms control to the presi-

ultimate threat of nuclear retaliation

We have little choice: today's tech-

nology provides no alternative."
But the constant attempts from the

White House to talk strategic de-

fenses up by talking retaliation down

a strategic defense, the bright new world, fails to materialize and we

arrive back where we started -in the

Enthusiasm for the SDI is thus an example of the familiar human failing of constructing the future before

to link up with the three Benelu countries and form a super-efficier customs union at the heart of th Community might be warmly we comed. In fact, it is a development that must be viewed with alarm

The risk is that the five countrie now trying to bind themselves togeth er into a new common market wi instead destroy the Community of It soon to be 12. In order to streamling their customs and immigration precedures, they may jeopardize it.

The attractions of recreating th original spirit of the Common Maket are understandable. There is conviction in Paris and Bonn the something has gone very wrong wil the Community launched back i. 1957, and that only the original sisignatories of the Rome treaty a sufficiently "European" to rebuil the EC that the founding fathers e visaged. (If Italy has been exclude from the negotiations now takin place in Paris, it is chiefly because President François Mitterrand feare

the Italian propensity for delay.)

"A strong flavor of the good of days," was how a senior Belgian fit ure described the atmosphere whe French and West German ministe met Benelux counterparts in Brusse last month to launch the comple negotiations for devetailing nation procedures. By early next year a true should be able to cross any border: the new zone in under 10 minutes.

The French-German drive to cor the tighter links of the Benelux co. nomic union dates back to last Ju and the Kohl-Mitterrand summit Saarbrücken. Hard on the heels -. the previous month's Fontaineble decision by all the EC heads of go And we may have no choice. If past experience is any guide, the attempt to escape from the nuclear dilemma emment that internal trade libers izations were urgently needed, ti two leaders evidently concluded th they could not wait for Brussel: with a new arms race and, despite cumbersome diplomatic procedure

The Benefux countries were d lighted. They are ardent supports of ever closer European integratie They have been the Community soul and conscience ever since (day in September 1944 when the B-gian, Netherlands and Luxembor governments-in-exile met in Lc don's Savoy Hotel to agree on a q toms union that came into force ft

years later as the EC's precursor. The Benelux union has remaine kernel of the Community with spec cooperation pacts uniting the thi governments. But it is transform into something much less desiral by the addition of France and Wi Germany, it becomes the vehicle

a "two-speed Europe." The possibility that the EC m split, with one group forging ahe while the other lags ever farther t hind, is an old political bogey. T

will make it increasingly difficult to regenerate and maintain public support for the West's nuclear doctrine. What if, at the end of all the research, EC's cohesion and its internation clout would be weakened. Yet the truth is that synchronizing the political stances of the 10 members governments has become progn sively harder, and most of those go ernments have begun to entertain t idea of a two-speed Europe even

they have been careful not to say The code words are "a Euro of variable geometry," meaning priects like Airbus that do not precise mirror EC membership, and "a twitter Europe" that acknowledges the some EC countries are richer th others even if economic converges is officially the Community's goal

officially the Community's good on to Europe has been that convergence essential to unity. But that spirit or enlightened self-sacrifice by the ric er EC countries no longer prevai plain enough in Dublin last Deceber when he remarked that the EC a convoy that can no longer afford, sail at the speed of the slowest shir. Mr. Kohl and others who belit

that the EC's future lies with the Uge countries that are the most programmer might reflect on the wartis they are, the safer they become.

It is in any case impossible to the clock back to the time when it

Community was a trading bloc rati today. Bonn and Paris would do h ter to discuss trade liberalization wall of their EC partners. International Herald Tribune.

The Soviet SS-18 (in the 10-warhead or percentage of America's ICBMs or ICRMs are only part of the story.

strategic force is actually significally more vulnerable to a U.S. surp attack than the total U.S. force is! Soviet attack. MX deployment make this disparity much greater.

Defense Is Only a Vision; Deterrence Is a Reality clear retaliation in order to prevent

HAMBURG — A European who remembers the heated and bitter debate over whether U.S. Pershing and cruise missiles should be deployed must ask for understanding if he finds it difficult to follow the present American advocacy for strategic-missile defense.

In the debate in Europe, anti-nuclear protesters, the political left and many churchmen were claiming that deterrence was no longer acceptable as the basis for security. It was, they said, profoundly immoral to threaten the destruction of another society. As we know, their protest did not succeed. But now no less a person than the president of the United States is saying virtually the same thing:

The fluman spirit must be capa-ble of rising above [deterrence]. - March 1983.

Would it not be far more humanitarian to say that now we can defend against a nuclear war by destroying missiles instead (slaughtering millions of people? - October 1984.

There is a better way of eliminating nuclear war than retaliation with a deadly counterstrike. — February 1985.

What makes these remarks so dis-turbing is not that they may or may not be correct at some time in the 21st century, but the effect they have now in the 1980s and 1990s.

At this stage nobody knows if there ever can be, from a technical point of view, a reliable defense against ballis-tic missiles; most scientists doubt it. And nobody knows all the countermeasures that a determined enemy might develop. Nor does anyone know whether such a system could be funded. The price tags currently quoted of around \$500 billion are as speculative as the rest of the exercise.

On this shaky basis, caution rather than enthusiastic advocacy would seem the order of the day. One would expect a serious research effort to

By Christoph Bertram

identify what is possible in defensive. The spectacle of an unrestrained systems, coupled with persistent emphasis that, for the foreseeable future, there is no alternative to the "balance of terror" as the underpinning of our security.

Yet we are seeing something very different. From the highest authority of the Western world comes word that the dreadful, morally repugnant days of deterrence through the threat of retaliation are numbered and the bright, new and morally sound alter-

native of strategic defense is nigh. If deterrence were a robust doctrine with strong public support, one could dismiss these statements as the typical American way of presenting visions as if they were reality. But deterrence is far from enjoying popular support. It has taken a serious knocking in recent years. Skepticism, doubts and outright rejection have

grown in all Western societies.

arms race has raised fears about where all this might end. The deadlock in arms control has disappointed many hopes. Military men and civil-ian strategists have pretended that somehow the waging of nuclear war could become a serious military option. The peace movements have frightened themselves and others with the belief that deterrence is driving the world to certain disaster.

The net result is that deterrence through the threat of nuclear retaliation has become a brittle concept not vis-à-vis adversaries but in the eyes of our own citizens. And yet to date it remains the only concept we

have for survival in the nuclear age. Deterrence has helped to keep the peace between East and West for 40 years. Unless political leaders should dent and the secretary of state, notes, lose all caution, it is likely to continue for "at least the next 10 years we will continue to base deterrence on the to do so. To fight a nuclear war may

Seemingly Seamy and Thus Unseemly

WASHINGTON — "Unseem-ly" is not a word used often these days. If it is not illegal, goes the post-post-Watergate morality, it is not wrong. To denounce an act as "unethical" draws a smirk. "Im-proper" gets a shrug. The weakest of these, "unseemly," carries as little sting as "inappropriate."

I animadvert here on what ob-

servers in Washington have come to call, with world-weary amusement and not the slightest pricking of conscience, "the BMW affair."

As scandals go, it is no big deal. White House aides, advance men and Secret Service agents went to West Germany to make arrangements for President Reagan's trip to the Bonn economic summit in May. Many of the Americans pro-

ceeded to make excellent arrange-ments for themselves, using diplo-matic passports and their Reagan association to purchase BMW automobiles at a 20-percent discount
A few of us — bluenoses, stiffs,
sensation-seeking ethicists — think it worthy to note the irony in the president's men paving the way for his economic discussions about the overvalued dollar by taking the time to ship home German-made

cars for personal use in America. Some doubt that it is fitting for White House aides, whose transportation to Europe was paid by the taxes of autoworkers in Detroit, to take advantage of that travel to buy the products of those who compete with American autoworkers. A few others lift an eyebrow at the propriety of U.S. government officials getting something for By William Safire

nothing. In the case of Michael Deaver, the presidential aide who rose to great heights on the basis of his sensitivity to public opinion, his "perk" was a saving of about \$8,000 on a sedan. What did BMW expect to receive in return for this largesse? Ordinary American tourists and tax-harassed executives could ask: When these cars are resold in America new or used, should this discount, available only to some special Americans with black diplo-

matic passports, be reported to the

IRS as a taxable fringe benefit? After Newsweek unveiled the deal, a Secret Service spokesman told Howard Kurtz of The Washington Post that none of its agents were involved. Said a BMW offi-cial, asked if the special discount would be available if any White House officials planned to resell the cars. "I'm in the car business, I'm

not in the morality business. How did President Reagan react to the private dealings of advance men sent abroad on the public's business? His was the classic everybody-does-it response: "You're talking about something that has gone on for a great many years, that exists in our embassies in all other countries. It's a standard practice."

The White House counsel, Fred

Fielding, was called upon to give

his imprimatur to the car-buying scheme. The role of White House

counsel has degenerated into (1) publicly condoning the tawdry acts, short of outright graft, of staffers:

(2) ducking embarrassing inquiries;(3) writing a new regulation to prevent others from doing it again.True to form, Mr. Fielding put out a statement that he found "nothing per se illegal or unethical" about the purchases of the nine

luxury cars on the Bonn advance. Then he distributed a directive forbidding future abuse of the diplomatic passport by advance men. The Secret Service spokesman, it turns out, had been misinformed; some agents did purchase the BMW cars. White House aides who drive

rickety American-made vehicles charge that this deal was bruited about for months by members of the Secret Service White House detail. The new secretary of the Treasury should ask: Granted, such acceptance of foreign favors is not unlawful, but isn't it unseemly for these brave men to be touting foreign-car discounts on the side?

Ah, there is that word: "unseemly." When something gives you a creepy feeling, when the president of the United States is forced by the dictates of personal loyalty to uphold a practice he knows demeans his aides and his office; when the lawyer on the premises says it was okay up till now, but not to worry, it won't happen again — then we have an example of unseemliness.

People in high places tend to feel that an admission of unseemliness weakens them. Not so. Mr. Reagan would have done better to say: "i know it's been done all along, but that sort of thing doesn't set right with me. I told them to cut it out." The New York Times.

Noah's ark could not have landed on Mount
Ararat in Turkey, where many have sought its remains, according to a

Noah's ark could not have landed on Mount
Ararat in Turkey, where many have sought its remains, according to a report by Yilmaz Guner, a government geologist who analyses forms of landscape. But he did not rule out the possibility of the ark's having come to rest on Mount Cudi, also in Turkey.

In a paper prepared for a scientific convention, Dr. Guner said that the Old Testament flood was probably an ocean tidal movement and that Ararat, near the Soviet border, was too high to have been reached by it. A sossible landing place was Cudi, near the border with Iraq, he said. He said a boat-shaped rock formation on Ararat was merely a shape requently found in volcanic regions.

WASHINGTON (NYT) — The ability of honeybees to remember the that said patterns of flowers seems more sophisticated than scientists Dr. James L. Gould of Princeton, using an experimental device that ad artificial flowers with different patterns, tested honeybees' abilities to

earn the differences. He concluded, in a report in Science magazine, that he bees can indeed remember by storing photo-like images in their

There also seem to be prejudices built into honeybees' recognition systems, he said. For example, it has also been learned recently that bees seem to prefer the color violet. No one knows exactly why this preference xists, but the bees will learn most quickly to recognize violet-colored

World Has 344 A-Plants, Agency Says

VIENNA (NYT) - By the end of 1984, the International Atomic Energy Agency reports, there were 344 atomic reactors - 33 came on line ast year — delivering electric power in 26 countries. The agency said nuclear reactors have an accumulated 3,500 years of operating experience with no accident having significant harmful effects on the public." The percentage of U.S. electricity derived from nuclear power, the

stimate for the Soviet Union was 9 percent.

The French percentage, 58.7, was highest, followed by Belgium, 50.8 percent, and Finland and Sweden, both more than 40 percent. Others ncluded Switzerland, 36.5; Bulgaria, 28.6; West Germany 23.2; Japan, 22.9; Hungary, 22.2; Spain, 19.3; Britain, 17.3; Canada, 11.6; Czechoslo-akia, 8.5; and the Netherlands, 5.8.

Cities Called Mosquito Breeders

ATLANTIC CITY, New Jersey (AP) - U. S. urban areas have become nime breeding grounds for mosquitoes, which are attracted by lights and sools of water, Dr. William R. Horsfall, professor emeritus at the Iniversity of Illinois at Urbana-Champaign, has told the American Mosquito Control Association at its annual meeting.

One result of the rising urban mosquito population may be an increase a cases of mosquito-carried disease, he said. "Nationally, the mosquito opulation is greatly reduced." he said, but the insect's numbers are on he rise in metropolitan areas.

Dr. Horsfall said lights on buildings and the blue street lights popular - n most urban centers draw mosquitoes, while sodium vapor street lights with an orange glow are less alluring. In addition, development in cities us upset normal drainage, he said.

New Coating Sought for Catheters

GAINESVILLE, Florida (UPI) — Infections associated with urinary atheterization, which about 7.5 million people undergo in the United hates every year, are believed to contribute to up to 56,000 deaths nnually, but a University of Florida engineer is trying to develop a oating to prevent the buildup of crystalline material frequently observed a such infections.

Chris Batich, a materials engineer, said the coating would prevent alcium oxalate crystals from sticking to the portion of the catheter that nters the bladder and in the interior of the tube.

Catheier manufacturers usually apply silicone or Teflon coatings to the ubes. But Mr. Batich said the coating must be able to flex with the aflation of the small balloon that locks the catheter in place, and tiny racks that attract the crystals often develop on the surface.

Learning to Live With the Artificial Heart

By Lawrence K. Altman New York Times Service

UCSON, Arizona - William 1 J. Schroeder did not attend his son's wedding Saturday, but he did attain a medical milestone. Despite extreme physical weakness and damage from a severe stroke, he reached his 112th day on a Jarvik-7 heart. That is how long Dr. Barney Clark, the first human to receive the device, lived with it.

Artificial hearts got two other boosts last week, both from the Food and Drug Administration. The federal agency approved Dr. William S. Pierce's plans to use the Penn State heart experimentally at the Hershey (Pennsylvania) Medi-cal Center. And an FDA official on a fact-finding visit to the Universi-ty of Arizona Medical Center en-couraged Dr. Jack G. Copeland to seek permission to use artificial hearts in the transplant program he heads here in Tucson.

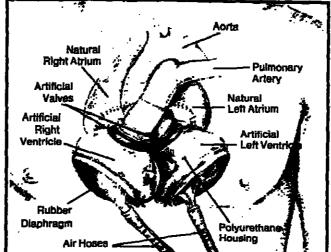

Dr. Copeland stirred up a controversy recently when he performed a bizarre marathon of operations in which he implanted the Phoenix heart, an unapproved de-vice, in the chest of Thomas Creighton in a desperate attempt to save the 33-year-old antomobile mechanic's life. The implant, necessitated by the failure of a human heart that Dr. Copeland had transplanted the previous day, was foligency reported, was 13.5, roughly equal to the world average. The lowed by another human-heart transplant

> Despite Mr. Creighton's eventual death, the sequence of events illustrated how an artificial heart could be used as a bridge to buy time until a human heart could be found. A small but growing num-ber of doctors envision the day when tens of thousands of heartattack victims, taken to hospitals after their hearts stopped or they developed shock, will wind up with the artificial implants.

> Some may spend the rest of their lives on the devices. For others, the experience may be temporary just long enough to give their damaged organs a chance to heal or to sustain them until a human transplant can be found.

> right and left ventricles held together by materials such as Velcro and attached to the recipients' natural upper heart chambers.

But many more are likely to be partial hearts designed for short-term use and already being tested experimentally in several hospitals. These machines, called left ventricular or right ventricular assist devices, take over the function of the

How Jarvik-7 artificial heart fits into chest.

ventricle, giving the damaged muscle time to recover.

Dr. Copeland used the Phoenix heart as a temporary measure, al-though he said later that he had not considered what he would have done if, during the time it was sus-taining Mr. Creighton, the patient had had another stroke or other medical catastrophe that would have made the second transplant inadvisable. Dr. Copeland said the machine, which was designed for a calf, not a human, worked flawlessly until it was removed to give Mr. Creighton his fourth heart of the week (counting the one he was born with). The surgeon said Mr. Creighton's death was not due to the artificial heart but to complica-

Although some legal and ethics involves a thrice-weekly cleansing experts criticized Dr. Copeland's of the blood. This allows greater action and said the government freedom than that now offered to a

tions from being on a heart-lung

bypass machine for more than 10

hours while Dr. Copeland waited

for the artificial organ to arrive by

should take steps to prevent further such moves, Dr. David W. Johnson of the FDA called it "a unique

Dr. Johnson, who made his comments after a five-hour meeting with officials and physicians at the University of Arizona, said he would review the case with his superiors in Washington. "We may find that the FDA is part of the problem," he said. "Maybe we should be approaching some situations differently than we have."

Legal and bureaucratic considerations aside, such use of the artificial heart would give heart transplant patients the benefit of backup technology now available to kidney transplant patients. When someone awaits a kidney transplant or the organ fails after surgery, an individual can be sustained by dialysis, which usually

Skyrocketing Shuttle Prices Pose Dilemma

total artificial heart recipient, who must be tethered to a power supply

while the device is in place. But in bringing natural heart transplant procedures within reach of more patients, artificial hearts can be expected to aggravate an already serious shortage of organs. Dr. Copeland counted on an informal priority system to move Mr. Creighton to the head of the waiting list for his second human heart transplant. It would certainly be harder, ethically if not practically, to jump an individual ahead of others when artificial devices were keeping more end-stage heart pa-

Further, the demand for human bearts to transplant is likely to increase because of the one million or so Americans who have undergone coronary bypass surgery. Many are bound to become transplant candidates as the veins taken from their legs and put in their hearts deteriorate from the inexorable damage of atherosclerosis, the underlying cause of their heart disease.

Little wonder that Dr. William C. DeVries, the surgeon who im-planted the Jarvik-7 in Mr. Schroe-der and Dr. Clark, believes that patients and doctors must consider all artificial hearts permanent. Even if medical catastrophes that could make transplant operations inadvisable are avoided, he argues, there will still be no assurance that a human heart will be available.

Effectiveness of Heart Drugs

United Press Inter WASHINGTON - Studies show that tissue plasminogen activator, which can limit the severity of heart attacks, is almost twice as effective as streptokinase, a similar substance now on the market, ac-cording to Dr. Eugene Passamani, associate director of the National

radius of 8 billion miles.

Many of the devices will be total artificial hearts like the Jarvik-7, the Penn State heart or a variation ment wants even higher prices so commercial rockets can compete for satellite launching business. of the Phoenix heart. These include space-agency missions.

WASHINGTON — NASA proposes to raise the price of a space shuttle flight to \$87 million starting in 1989, but the U. S. Transportation Depart-

Therein lies a dilemma. A new report by the Congressional Budget Office says significantly higher prices for a shuttle launch will divert some of its isiness to the expendable European rocket Ariane unless the Arianespace consortium raises its prices. But unless the shuttle prices are considerably higher than the National Aeronautics and Space Administration proposes, companies trying to find business for expendable Delta and Atlas-Centaur rockets are not likely to succeed, the report said.

If the price of carrying a satellite aboard the shuttle left ventricle, the main pumping is so high that it makes it cheaper to fly on a Delta or that price — figured on the basis of 1982 dollars — chamber of the heart, or the right Atlas-Centaur, NASA will lose all but the most specalled for recovery of average operational costs only.

cialized commercial and foreign satellite business, the budget office said. That would mean the cost to taxpayers for the remaining shuttle missions would be much more than it would be if NASA had commercial and foreign business to go along with military and

The price for a shuttle launch is \$38 million in 1982 dollars. Starting next year and running through 1988, the price will be \$71 million in 1982 dollars, but the analysis said that will not cover all costs.

The NASA administrator, James M. Beggs, said President Ronald Reagan directed NASA to produce a pricing plan for "full cost recovery" for shuttle operations starting in 1989. Eric Hanushek, deputy director of the Congressional Budget Office, told a House subcommittee that NASA proposed \$87 million a flight for 1989 through 1991. Mr. Hanushek said

IBM and drug stocks," Mr. Ackerman said.

He added that some decline in the dollar was needed after its recent strength, and if the currency swings become more predictable, the investment picture will improve. He said the currency fluctuations of the last few days represented an over-reaction to the problems involving some Ohio savings and loans.

merce Department reported personal income gained 0.3 percent in February. The January figure was revised to show an increase of 0.6 percent.

The report also showed that personal spend-

ing was up 0.7 percent in February, slightly less than December and January. The report tended to reinforce the perception of analysts in recent days that the economy, while healthy, is not booming like it did at the beginning of 1984. John Burnett of Donaldson, Lufkin & Jensent days that the second control of the second control

rette said stocks were reflecting confusion due to the volatility of currency and precious metals markets. He also said the decline was in reaction "to the slippage in IBM because they're throwing in the towel with the PCjr." On the floor, Texaco Inc. was near the top of

the active list at mid-session, down slightly. PepsiCo. was up in heavy trading. The company denied rumors that it might be acquired by Philip Morris. Auto issues weakened after several brokerage

its IBM PCjr home computer. IBM has had problems marketing the machine.

National Semiconductor was down slightly. Among the energy issues, Exxon and Mobil were up slightly. Phillips Petroleum was down.

WALL STREET WATCH

With Dollar Up, Analysts Look to the Service Sector

By EDWARD ROHRBACH

International Herald Tribune ARIS — With the dollar acting so unstable that it is liable to go out and shoot somebody, investors in U.S. stocks can't be blamed for trying to find cover. But where to hide? Greg A. Smith, director of research at Prudential-

Bache, has summed up the problem:
"If the dollar declines sharply," he noted, "investors in the stock market could lose valuation as bond and other interest rates react to the dollar's weakness.

"If the dollar remains near current levels or moves higher, profits could easily be flat for the year," he added, "which would suggest that even with a better valuation, the stock market is very

Investors know the

U.S. economy has

moved to a service

orientation.'

near fairly valued based on our expectations that stocks would sell at between 11 and

12 times earnings this year."
With the strong dollar undescutting corporate profits so severely, Mr. Smith said investors must now "segment the universe of companies" on Wall Street between service-

type, which are relatively unaffected by currency movements, and those in the manufacturing sector that are affected.

"The stock market as it is presently constructed really doesn't

line up with the strength of the U.S. economy, which, as most investors know, has been moving toward a service orientation for some time," he continued. "We have a service economy and a manufacturing stock market."

Fred Fraenkel, chief investment strategist at the firm, elaborat-

Fred Fraenkel, chief investment strategist at the irrm, etaporated that this "bodes very poorly" for most stock-market indexes, because "in general, large capitalization companies are more negatively impacted by the dollar's strength than many small public or privately traded companies."

Only about one-third of market capitalization is in service-lated stocks, while two-thirds of Standard & Poor's 500 equities

Only about one-third of market capitalization is in service-related stocks, while two-thirds of Standard & Poor's 500 equities is still related to goods production, he pointed out. Taking all this into account, Prudential-Bache has been adding

stocks in the service sector to its "ultra-focus list," most recently Shoney's and Jaguar. Meanwhile, all technology stocks have been removed from the list. Mr. Smith explained: "It reflects that the part of the economy represented by manufacturing has really not left the recovery that the economists have been saying exists."

Where the dollar will head and its effect on Wall Street is

"plagning investors at home and abroad," echoes Thom R. Brown, chairman of the investment policy committee at Butcher However, he added: "The current dollar problem will be in

good part alleviated and investor psychology will improve dramatically if Washington produces positive action towards reducing the deficit."

Decisive action here, he predicted, will produce "a powerful upsurge" that could carry the Dow average "well above the 1,500

Stocks among the Dow industrials that Butcher & Singer thinks would advance "30 percent or better from current levels, given restoration of investor confidence," are Alcoa, DuPont, IBM, Minnesota Mining & Manufacturing, U.S. Steel, AT&T, Goodyear, International Paper and Owens-Illinois.

"Stop working about higher interest rates" he added "It is

"Stop worrying about higher interest rates," he added. "It is simply not in the cards as long as the dollar stays strong."

The dollar's latest gyrations are providing new challenge to what Robert G. Heisterberg calls "world-class investing." He is research director at Alliance Capital Management, which handles more than \$20 billion, making it Wall Street's largest investment manager outside the money-market funds.

Chucizing U.S. institutional investors for bei and underinvested" in other countries' markets, he said it is essential now in analyzing companies to evaluate their prospects (Continued on Page 15, Col. 8)

Europe and U.S. Race to Commercialize Space

By John W. Anderson New York Times Service

HOUSTON - Mention the "space race" and most people still think of a battle for military supremacy between the Soviet Union and the United States.

But a new space race has developed, the spoils of which are not political but economic. It is the push to command the lion's share of private rockets and communications satellites; to make pharmaceuticals, semiconductors, and other delicate products in a totally controlled environment

At stake is more than \$52 billion in annual revenues by the end of the century, according to Center for Space Policy, a Cambridge, Massachusetts, research investment firm. Preliminary results show that the United States is running behind the competition.

"We are moving slow as turtles compared to the Europeans," warned Christopher Podsiadly, director of the Science Research Laboratory at Minnesota Mining & Manufactur-

The problem is not lack of scientific acumen, but cash. By starting to "privatize" space activities — for example, by selling to the private sector rights to rockets originally built for and owned by the National Aeronautics and Space Administration — President Rouald Reagan has put U.S. companies in a dilemme.

For although U.S. concerns have been given a shot at a potentially mammoth market, they are pitted against European concerns that are subsidized by their governments. If this situation continues, U.S. companies say they will fall permanently behind in all as-pects of the commercialization of space. Transpace Carriers Inc., a 17-employee

company in Greenbelt, Maryland, is experiencing such problems in its attempts to turn its newly acquired rights to launch a Delta rocket into a thriving business.

The company was started in 1982 by a group of NASA technicians who wanted to capitalize on the government's decision to allow private companies to launch rockets. McDonnell Douglas Corp., the manufacturer of the Delta rocket used in more than 160 government-run launches of satellites and

scientific experiments, has agreed to build it

for Transpace.

Transpace has yet to take physical ownership of a rocket, but has spent \$9.5 million setting up shop and trying to drum up inter-est from telecommunications companies and anyone else who might eventually launch

The company was prepared for U.S. com-petition. For example, General Dynamics Corp. now holds ownership rights to the Atlas Centaur rocket and plans to launch it

itself. And the government-owned space shuttle has been launching communications (Continued on Page 13, Col. 3) --

New Law Allows Thrift Units in Ohio to Reopen

By Gary Klott New York Times Service

COLUMBUS, Ohio - The Ohio Legislature approved emergency legislation Wednesday allowing 69 closed savings and loan associations to open and give depositors \$750 per month until state officials permit the institutions to resume normal operations.

Governor Richard F. Celeste quickly signed the legislation and later met privately with about 120 executives of closed savings and loans. After the meeting, Thomas Batties of the state Commerce Department's savings and loan division said that the first institution

might reopen Thursday.
"We are protecting \$4 billion, the savings of 500,000 Ohioans," Mr. Celeste said in a statement prepared for the signing.

The measure approved would allow an institution to reopen as soon as it applies for federal deposit insurance and state banking officials determine that it is in strong enough financial shape to qualify for the insurance.

The impact of the crisis spread to international financial markets Tuesday and was blamed for a rise of about \$36 an ounce in the price of gold and a sharp decline for the

Although investors in Europe may have reacted in an exaggerated fashion, analysts said, the Ohio troubles were one more indication

that the American banking system is far more unstable than it used to

After two days of legislative debate and partisan politics, the Re-publican-dominated Senate voted unanimously early Wednesday to approve a House measure passed several hours earlier.

The measure would allow all institutions to open almost immediately on a limited basis so the 500,000 depositors affected by the closings could withdraw up to \$750 a month to meet necessities.

Mr. Celeste ordered closed 70 state-charted but privately insured thrift institutions last Friday after mounting concerns over the Ohio Deposit Guarantee Fund triggered a multimillion-dollar customer run on deposits at several of the institu

The run was touched off by the collapse earlier this month of Home State Savings Bank in Cincinnati after it was disclosed that it may have lost \$100 million in the collapse of a Florida securities

Over the weekend, state and Federal officials decided that federal deposit insurance was the only way to restore enough public confidence in the institutions to allow them to reopen.

One association reopened Monday as a member of the Federal Savings and Loan Insurance Corp.

and paid to depositors. Base rates were raised to 14 ent from 12 per having already been increased twice in that month to defend the pound

Schutz Steers Porsche **Toward New Expansion**

By Warren Gerler ational Herald Tribune

STUTTGART - How many high-performance Porsche sports cars will be sold this year is a relatively simple calculation for Peter W. Schutz, the American chairman

we can build," said Mr. Schutz, 55, who became Porsche AG's chairman in 1981 as an outsider to both the family-owned company and to the business of selling cars.

World demand for Porsches, whose prices range from 34,650 Deutsche marks (\$9,307) for the 924 model to 114,000 DM for the 911, has never been stronger, he

That was the message that Mr. Schutz planned to convey Thurs-day at Porsche's first public shareholders meeting. Last April, the company offered the public 30 per-cent of its capital in the form of non-voting preference shares.

There could be anywhere between 400 and 1,000 shareholders at Thursday's meeting, there's just no way for us to know," Mr. Schutz

Since the initial listing on the Frankfurt Stock Exchange at 780 DM a share, Porsche shares have surged steadily to more than 1,300 DM this week. On Wednesday, Porsche's shares closed at 1,293 DM, down 27 DM.

For Ferry Porsche, 75, board chairman and son of the company founder, luring Mr. Schutz from Klöckner-Humboldt-Deutz AG appears to have paid off in no small As head of the diesel-engine divi-

sion for the Cologne-based engi-neering group. Mr. Schutz had been involved in the sale of truck motors to the United States. Mr. Porsche saw in the American engineer a manager who could bring an informed view about con-

sumer expectations in the U.S. market and who also could estabhish a team-oriented approach to running a small, but rapidly expanding car company.

Since Mr. Schutz assumed chairman's duties, Porsche's profit has soared more than ninefold to 92.4 million DM in the last fiscal year, ended July 31, from 10 million in

riod, to 2.49 billion DM last year from 1.17 billion DM in 1980-81. The number of Porsches sold in the United States increased to 21,000 in fiscal 1984 from 7,800 in 1980-

W. Schutz, the American control of the West German automaker.

"What our sales volume will be is metalworkers' strike in May and June. But sales in the first half of the firs Like other German automakers, 1.35 billion DM from 1.275 billion DM a year earlier.

An auto industry analyst at Frankfurt bank said that much of the sales increase's value could be traced to the appreciating dollar because 47 percent of Porsche's cars are sold in the United States.

"The value of the cars being sold is increasing at a faster rate than the number of cars being marketed, but, nonetheless, both volume and value are increasing steadily," the analyst said. "Dollar dependency is certainly a risk for Porsche.

"If the dollar drops a bit below 3 DM, we foresee 1985 profit about even with last year," the analyst said. "If the dollar stays as high as it is or goes a bit higher, then profit per-share could climb from 110 DM to 140-145 DM."

The analyst said a trend toward purchasing high-value sports cars in the United States would likely continue through 1987 and, despite stiff price competition from Japa-nese companies like Mazda and Datsun, "Porsche's reputation for quality may justify the price differential" in customers' eyes. Porsche's work force of 7,000 has

been hard-pressed to keep pace with increasing foreign orders, par-ticularly from the United States, where Porsche last year established (Continued on Page 15, Col. 5)

BM to Stop Making **PCjr Home Computer**

By Andrew Pollack New York Times Service

SAN FRANCISCO - Internaonal Business Machines Corp. has ecided to cease production next onth of its PCjr home computer. machine that never quite caught a in the marketplace.

IBM said Tuesday that it was king the action because invennies were sufficient to meet future emand. The company said it ould continue to market the remining computers and to support se product by providing software, sare parts and optional hardware

Nevertheless, the surprise anamcement in effect signals the ad of the PCjr, a product that once as expected to establish the same minance for IBM in the home arket that its initial PC estabthed in the office market.

The second secon

IBM thus becomes the latest caalty of the disappointing market in home computers. Many other impanies, including Texas Instruents Inc. and Coleco Industries ic., have withdrawn from the marafter failures.

Commodore International Ltd. as seen its sales and earnings ummet and Apple Computer Inc. cently announced that it would ose its factories for a week beuse of bulging inventories.

"The home market didn't exand to the degree IBM and many oservers thought it would," said ihn Q. Pope, a spokesman for 3M in Boca Raton, Florida, where e personal-computer operations e based. "But that doesn't mean e home market doesn't exist." IBM did not say whether it ould abandon the home market anoletely or whether it was planng a new product. Some analysts it would be inconceivable for IM to desert the lower-priced

market, especially because that market includes schools.

"I can't imagine they would give up that low end of the market," said Egil Juliussen, chairman of Future Computing Inc., a Dallas market researcher, which estimates that IBM sold 275,000 PCjr's in 1984. "From a strategic point of view they ought to have something to take its place."

Many analysts expect IBM to soon miroduce the PC2, an ad-vancement on the original PC office computer that is expected to have a more powerful microprocessor. The price of the original PC is also expected to be cut.

The cancellation of the PCir indicates that an even broader realignment of IBM's product line might be in store. However, the IBM spokesman indicated that a machine to replace the PCjr is not likely to be introduced soon.

Norman DeWitt, director of the ersonal-computer industry service for Dataquest, a market researcher, said he thinks that IBM made its decision because it was not making a sufficient profit on the PCjr when it sold below \$900, the price required to stimulate sales. He said the dropping of the PCir would be good news for Apple Computer, whose Apple II line competed di-rectly with the PCjr.

The PCjr had trouble from the start. Introduced in late 1983, it did not reach the market until early 1984, missing the 1983 Christmas season. The machine also was ridiculed for its keyboard, whose rubberized keys resembled chewing gum tablets. IBM eventually replaced the keyboard with a more conventional one.

IBM shares closed at \$130.875 Tuesday on the New York Stock Exchange, up \$2.50 from Monday.

Wang Considers Reorganization, Some Layoffs

Los Angeles Times Service

BOSTON - The president of Wang Laboratories Inc., the computer company, said the company may reorganize in an effort to recover from its current carnings slump and may have to lay off some of its 31,000 workers.

John F. Cunningham also said Tuesday that its rival. International Business Machines Corp., is partly to blame for a slowdown that has hit Wang as well as such competitors as Digital Equipment Corp. and Data General Corp.

He said that IBM, by promising that it will soon offer products more advanced than those currently on the market has caused customers to delay product purchases.

Mr. Cunningham, at a press conference, also discussed Wang's announcement March 12 that its earnings for the three months ending March 30 would be 30 percent to 40 percent below those of a year earlier. He said this was caused by an

industrywide sales slowdown, the strength of the U.S. dollar and problems in Wang's performance, including delays in the shipping of new products and customer service that he said must be improved. But, he said, the slump has created a sense of urgency and thus has given Wang a "major opportunity" to reorganize and trim a staff that has grown too large.

Lockheed Plans \$10-Billion Expansion increase staff from 400 to as many

By Ralph Vartadebian as 3,000 scientists, engineers and Los Angeles Times Service LOS ANGELES — Lockheed

Coro. has disclosed a strategic plan to spend 310 billion over the next center what is believed to be the decade on research and plant con-world's largest private aerospace struction, concentrated on its California aerospace facilities. The plan, described by Ben Rich,

Investors Plan Takeover of Storer

New York Times Service

NEW YORK — A group of investors has announced that it wants to gain control of Storer Communications Corp. and then liquidate the Miami-based broadcasting and

cable-television concern. The Committee for Full Value of Storer Communications Inc. said Tuesday that it would elect a slate of directors at the May 7 annual meeting and then "sell all Storer's assets and distribute the net proceeds to the company's stockhold-

The committee was formed by Coniston Partners, an investor group led by Paul Tierney, Keith R. Gollust and Augustus K. Oliver that has bought major stakes in Cyclops Corp. of Pittsburgh and Sooner Federal Savings & Loan Association in Tulsa, Oklahoma. The committee controls 867,400

Storer shares, or about 5.29 percent of the shares outstanding. Wall Street is keenly aware of the premium that broadcasting stocks

can command. On the New York Stock Exchange on Tuesday, Storer's shares rose \$5.75, to \$70.125, on a volume of more than 900,000 shares.

John Bonner, manager of corpo rate relations at Storer, said the company would not comment until it had studied the committee's filing made Tuesday with the Securi-ties and Exchange Commission. Mr. Tierney said: "Our invest-

ment philosophy is to try to find companies that are undervalued." Storer has posted a loss in each of the last two years, primarily because of the cost of expanding its cable-television operation. Last year, the company had a loss of \$16.7 million on revenues of \$536.8

The company has shed some of its troubled cable systems, and analysts are optimistic. Peter Appert of Cyrus J. Lawrence Inc. forecasts earnings of 65 cents a share this year and \$1.55 a share in 1986.

The ambitious expansion plan reflects Lockheed's surging profits, which have set records in each of the last three years. The company

earned a record \$344 million in 1984, up 31 percent from 1983, and posted a \$22.8-billion order backon equal to three years of work. Lockheed's commitment in research and capital spending also raises the ante among aerospace

tion of military programs, which will be fewer and more hotly con-Air Force and Navy orders during the rest of this century are not expected to be enough to support

Japan Securities Set for Records

the U.S. aircraft industry.

TOKYO - Japan's major securities houses are expecting record current profits in the first half-year ending March 31, according to spokesmen.
Nomura Securities Co. pre

dicts a record first-half profit of nearly 100 billion yen (\$385 million) against a record 74.7 billion yen in the like period last year. Daiwa Securities Co. has revised its current profit fore-cast to a record 65 billion yen from the earlier predicted 62 billion yen and the previous re-cord 48.83 billion yen a year

Equity trading volume on the Tokyo stock exchange rose 20 percent to 46,233 million shares in October to February, from 38,676 million in the like period last year, the stock exchange

ABC Inc. and Capital Cities nounced Monday that it plans to buy ABC, had their debt placed on a credit-watch list by Standard & Poor's Corp.

COMPANY NOTES

American Telephone & Telegraph Co. said it began beaming high-speed, digital data and videoteleconferencing signals via satellite to France over its International Accumet Reserved 1.5 Service. The service operates at a speed of 1,544 megabits of information a second. companies seeking the next generaproviding voice, data, full-color and full-motion video services.

BankAmerica Corp. had the ratings on its senior debt changed by Standard & Poor's Corp. to A-plus from AA-minus, on its subordinated debt to A from A-plus, and on its preferred stock to A-minus from

Bayer AG, the West German chemicals concern, said it has raised the bonus paid to its workers on 1984 results to 60 percent of average monthly pay from 42 per-cent for 1983. A spokesman said there is no official link between the higher bonus and any planned in-crease in the 1984 dividend from the 7 Deutsche marks (\$2.18) paid for 1983, but said the bonus is widely regarded as an indirect dividend indicator.

Denison Mines Ltd. of Canada said Clifford Frame was replaced as president by the vice chairman, Edward McConkey. The company did not elaborate.

General Motors Kenya Ltd., in which the Kenyan government has a 51-percent stake, said it plans to produce a four-door sedan named 'Uhuru" at its Nairobi assembly plant. The first of a planned 2,000 cars a year is expected to be completed in a few months.

H.J. Heinz Co., the U.S. food concern, expects to report higher earnings and revenues in the fiscal year ending in April, despite predictions of lower profit margins for

the U.S. food industry, according Communications, Inc., which an to the president, Anthony O'Reilly, Marketing costs will rise \$25 million to about \$320 million and the company plans a £100-million (\$113-million) capital spending program in Britain.

International Telephone & Telegraph Corp. said its Danish affiliate, Christian Roysing AS, was awarded a contract by Air Canada to supply a new data communications network for the airline's reser-

vations and check-in systems. The

contract's value was not disclosed. Lotus Development Corp. of Cambridge, Massachusetts, said the delivery of a software package crucial to the sale of Apple Computer Inc.'s Macintosh personal computer will be delayed two months. The announcement is a setback for Apple in its battle with International Business Machines Corp. in the office computer mar-

Miniscribe Corp. of Colorado said it has agreed to supply \$8.5 million of computer disk drives to Daewoo Telecom Co. of South Korea. Deliveries will be made over 12 months starting next month.

Sun Hung Kai Finance Co. had trading in its shares suspended on the Hong Kong Stock Exchange. An exchange spokesman said trad-ing will not resume before Friday. The company is expected to announce an accord to sell its banking subsidiary to Arab Banking Corp. and Sun Hung Kai chairman, Fung Kai Hey, for 360 million Hong Kong dollars (\$46.2 million).

Telefonaktiebolaget L.M. Ericsson, the Swedish maker of telephone switching systems, plans to raise its U.S. capital expenditure slightly in 1985 to approximately \$20 million. Much of the expenditure will be investment in software and marketing toward its Axe telecommunications system, the com-

million.

ADVERTISEMENT satellites for commercial customers INTERNATIONAL FUNDS for about \$19 million a launch. **Quotations Supplied by Funds Listed**

But none of the U.S. rocket launchers had counted on the entry of Arianespace, a private French company whose largest stockholdno assume neigh are supplied by the Funds listed with the those quotes are based on issue prices. The following cate trequency of quotations supplied for the IHT: ; (b) = bi-monthly; (r) = regularly; (l) = tregularly. er is the French government, It holds ownership rights to the Ariane rocket, which was developed by the European Space Agen-cy, a council of 11 European countries that supervises all major space projects in Europe. Arianespace already operates three Ariane rockets, and is expected to have a fourth ready for launching next year.

Arianespace currently charges between \$24 million and \$26 million for every communications satellite it sends into orbit, and already has sent up five satellites. Transpace, on the other hand, has yet to find a customer. It claims that it costs about \$37 million to send satellites into orbit aboard a Delta rocket, and that it would charge \$42 million a launch. Arianespace would not divulge its own cost estimates, but Transpace says that the French company's costs are much higher than its own. The reason for the difference in prices,

not recover full costs.
"We entered this business telying on the belief that we would operate in a free-market economy. aid Tony Savoca, president of Transpace. "But the Ariane is subsidized. If we don't get their price levels near full cost recovery, we are going out of business."

Transpace insists, is that Ariane-space is subsidized, and thus need

Transpace filed a complaint of unfair competition in the United States last year, claiming Arianespace charged U.S. customers less than it did Europeans. A decision is

expected by July.

Meanwhile, both sides remain ered on a case-by-case basis to by the year 2000. compete with the export market,"

For now, no Eu insisted Douglas Heydon, the French company's executive vice this research. Funding is provided president. But Mr. Savoca countered: "We want to compete with But the expectation is that private Ariane on a world market, but you have to first get rid of their subsi-

Arianespace. The Ariane and the

10 commercial satellites sent into pharmaceutical production in space in the last 14 months.

million this fall, in order to make ing a process known as electrophocommercial users bear more of the resis. spacecraft's costs. Now NASA is not sure it could make the increase

"Ariane will soon have a cost advantage of up to \$5 million on because materials are more easily rector of Shuttle Customer Services. "If we would lose all our commercial customers from the Shuttle, NASA's budget would go up at least \$250 million each year.

To make matters worse, the European Space Agency may build its own shuttle. In January, European ministers met in Rome and approved the Ariane 5, a rocket system that could launch a small, manned shuttle known as the Hermes. Research and developmen costs for the Ariane 5 are expected to exceed \$2.3 billion "France has a political position

to develop an independent manned capability," said Frederic d'Allest chairman of Arianespace. His colleague, Mr. Heydon, added: "We have injected an element of compe tition at NASA which should make them more efficient." Competition among U.S. and

European drug and electronic companies to capitalize on the low-gravity, high-purity manufacturing conditions in space promises to be as intense as that now occurring among the rocket-launch concerns The pure. microgravity environ-

ment of space allows special phar-maceuticals, crystals, and metal al-loys to be made which cannot be reproduced on Earth. Eric Meger, vice-president at Center for Space Meanwhile, both sides remain Policy, estimates that this will gen-intractable. Our prices are considerate a \$25-billion annual business

For now, no European company has put any money of its own into entirely by various governments. European companies such as West Germany's Messerschmitt-Bölkow-Blohm will turn the research

into commercially viable products. In the United States, by contrast. Even NASA feels threatened by shuttle are doing equally well in the the private sector must pay its own battle to win customers. According way from the start. McDonnell

Let's drink to what you don't know about Spanish food.

If you think Spanish food is gazpacho and paella, of course you're right. But if that's all you think it is,

と なるながら なるがっころ

you're not right enough. Spanish cooking is as various as the country itself, . Canario" or seven meat stew, with lamb, pork, beef, with every region contributing its own special dishes. rabbit, chicken, partridge and pigeon.

From the Costa del Sol comes a dazzling array of sea food, served simply grilled or broiled. In the Canaries, one must sample the "Pucherito

In Asturias, try the "Fabada" bean stew, with pieces of pork, ham, beef and sausage. Wash it down with the local cider for a perfect balance of flavors. In Madrid, the specialties are roast suckling pig and roast baby lamb, accompanied ideally with Rioja wine.

And from Catalonia comes Zarzuela, an assortment of fish and shellfish cooked in a tomato sauce seasoned

with gartic, paprika, parsley and wine. To all the regions and dishes we had no space to write about, a toast in Spanish sherry, brandy or wine.

Epic Views of a Small Country

By Jan Morris. 442 pp. Illustrated. \$22.50.

TT is just over 700 years since the English I completed the conquest of Wales that had been begun by the Normans. In 1282, the Welsh leader Llywelyn the Last was defeated in battle and subsequently killed in an ambush; in 1284, all Welshmen were formally

declared subjects of the English crown, and the

son and heir of Edward I was born at Caernar-

fon Castle and presented to the assembled Welsh chieftains — if legend is to be believed — as "a native-born Prince of Wales who spoke not a word of English."

After some sporadic rebellions, resistant

died down; then, at the beginning of the 15th century, the Welsh landowner Owen Glendow-er rose in revolt and united almost all his countrymen behind him in a war of indepen-

dence. For a few brief years, Wales was a state

as never before or since - for Glendower,

holding court with his chancellor and his con-stitutional lawyers and his Great Seal, sending out emissaries to France and Spain, was laying

claim to a throne that had never really existed.

As Jan Morris says, the miniature realm he

established on the fringe of Europe was a

visionary concept, sustained by visionary means. It was like a fictional kingdom of

Melting back into the mists, liable to be

confused in legend with King Arthur, Glen-dower has remained the foremost Welsh na-tional hero. "He is the Welshness in all Welsh-

men," Morris writes, "the spirit of their origins," and each chapter of "The Matter of Wales" is introduced by a little tableau, a

reminder of what might have been —the ideal Wales that Glendower contemplated from his

throne, and that still lives on as a shared

Morris is half-Welsh, and her "epic views of

a small country" are in part the expression of

an outside observer's curiosity, in part the

product of a deep personal commitment. Either way, "The Matter of Wales" ranks among her best books. It moves easily from brilliant

cameo to panoramic survey; it conveys a con-

stant humorous delight in unexpected quirks

and accomplishments; the writing sparkles,

On the contrary, one of the most impressive aspects of the book is the enormous amount of

information Morris manages to pack in — information about the religious history and

economic development of Wales, the land-

scape and climate, the flora and fauna (includ-

Valley, California.

The Associated Press

PARK CITY, Utah - Erika Hess of Switzerland got the better of a course that dumped most of her competition and went on to win a women's World Cup slalom ski race on Tuesday.

Hess, a two-time overall cup champion and the career slalom victory leader with 16, won by attrition. She completed the second run

WORLD CUP SKUNG

in 40.18 seconds for an aggregate time of 1:17.30, and then watched as American Tamara McKinney and first-run leader Paoletta Magoni of Italy both fell.

"It was good to have experience today," said Hess, 23. "The course was so steen, you had to know that was so steep, you had to know that you were going too fast, so you had to watch your line and round off the turns.

McKinney, who could have wrapped up the slalom title by placing second, was doing well when she hooked a tip only three gates from the finish. "I made some mistakes at the top and knew I had some time to make up," she said. "I just skied too straight."

Magoni, who carried a .64-second edge into the second leg. slipped six gates into the run and was eliminated.

Perrine Pelen of France second to Hess in career slalom victories with 15, posted a 40.24 on the second leg to take second in 1:17.42. Italy's Maria Rosa Quario, second after the opening run, finished 40.42/1:17.49 for third place.

Despite dropping to third. Quario was happy with her second straight strong U.S. outing (she was second to McKinney in a slalom at Waterville Valley, New Hamp-

"It was overwhelming. It's easier to claims. "You always downplay a maintain an adrenalin high than a game like this before you play." After being dumped by defenseman Joe Cirella in Tuesday night's first period, Washington's Bob Carpenter slid into Ron Low - and the New Jersey goalie opted for an immediate and sustained counterattack. Low received a pair of penalties in the fracas, and the Capitals converted them into the first two of four power-play goals in a 4-1 NHL victory.

ART BUCHWALD

Watching Gorbachev

WASHINGTON — The Soviet Watchers of Washington met last week in the "Darkness at Noon Russian Tea Room" to be briefed on Mikhail Sergeyevich Gorba-

Professor Nicholai Dubothe word. "Gorbachev may be

around for at a least 30 years, so you have to watch him very

closely."
"What should we watch for?" Since he is only 54 years old should you watch the way he stands when he's on the top

Buchwald of Lenin's Tomb. Remember, he is the first Soviet leader in 10 years who can watch a parade without a Politburo member on each side holding onto his arms so he won't fall down. This has its good and bad implications. The fact that he can stand on his own feet makes Gorbachev dangerous. At the same time we can expect more credibility from the Kremlin on their leader's health. Now when they announce he has a bad cold, we can all asssume he does have a bad cold." "Why is Gorbachev getting such

a good press?" Because he speaks English and wears nice suits. One of the reasons Americans never trusted the Soviet leaders in the past was that they dressed so tacky. How could you discuss ways of avoiding World War III with people who wore bag-gy pants and white socks? Gorba-chev is a new breed of Russian. His suit coat fits, and his choice of shirts and ties is impeccable. He's the type of person you're not ashamed to be photographed with at a summit conference."

"Does the fact that he's a snappy dresser mean he's a more formidable adversary?

"He could go either way. Khrushehev almost brought us to nuclechev's rise to the top of the ar destruction by hammering his shoe on the podium at the United Nations. Gorbachev would never kowsky, one of the leading Krem- do this because he's afraid it would linologists in this country, gave us ruin his shine. But you still have to watch him very carefully. The fact that he doesn't drool all over the medals on his chest could be to NATO's disadvantage. With the others you knew they weren't going to be around very long, so the West was willing to put up with their peccadillos for a year or two. With Gorbachev it will be at least three decades before he winds up in the

Kremlin Wall." "Do you think he will flaunt the fact that he is only 54 years old in Reagan's face?"

"He has already, in a hand-delivered letter to President Reagan. Gorbachev started by addressing it 'Dear Uncle Ronnie,' That threw the president for a loop. He doesn't even like his grandchildren to call

"Vice President George Bush watched Gorbachev all during Chernenko's funeral. What was his impression of the man?"

"As you know, Mr. Bush has become an expert at watching Soviet leaders at Moscow funerals. He came back quite impressed. Mr. Bush thinks Gorbachev has the potential to become the first Soviet yuppie premier. The leader seems to enjoy the good things in life, and one of his priorities is to provide more of the same for his people. The vice president believes if we can get Gorbachev to import more Perrier and buy more BMWs with stereo tape decks in them, the Soviets will lose their appetite for world

conquest."
"What about Mrs. Gorbachey? Should we spend much time watch-

You have no choice. The press is now referring to her as another Jackie Kennedy. Mrs. Gorbachev could be a big help to the Soviet ness Society, celebrating its 50th leader when he travels around the anniversary, has unveiled what is world. The thing to watch is his first trip to France. If he pulls a exhibition of the landscape photo- John Kennedy and says, I am the graphs of Ansel Adams, who do-nated 75 photographs to the society bachev to Paris, and it gets a big shortly before his death last year at hand, we're in a lot more trouble than most people think."

Trappers Cling to Endangered Calling

By Christopher S. Wren New York Times Service

RAE, Northwest Territories— Phillip Husky, a Dogrib Indian, brought six marten pelts into the Rae Cafe and laid them out carefully on the worn yellow linoleum floor. He wanted 50 Canadian dollars apiece for them. Arnie Steinwand, who owns

the Rae Cafe and adjoining grocery store and pool hall, had gotten up on the right side of the bed that morning, he said later, so he paid out 300 Canadian dollars (about \$220) without haggling. He planned to send the marten pelts to the fur auction in Van-

Husky was heading back to his trapline, a wide circuit of traps laid out in the snow of the scrub forests 80 miles (130 kilometers) to the north, after he loaded his snowmobile with groceries and

"I got a cabin." Husky ex-plained. His English is limited. "I go out tomorrow. One of my boys will come with me." When a visitor asked what he

would do if he could not trap. Husky, who has lived on a trapline for 45 of his 61 years, looked bewildered.

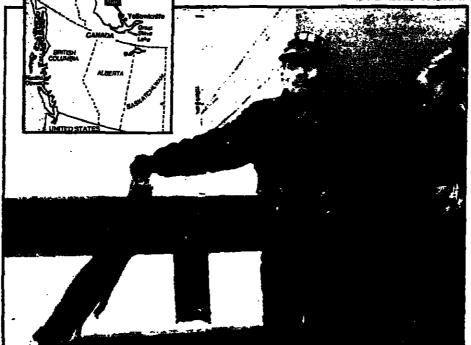

This town is about as poor as you're going to get," Steinwand explained later. "There's no employment here. About 90 percent live off the land."

If the Dogrib Indians could not trap, he said, "you'd make vege-tables out of them. It's the only thing they know how to do, and they're good at it." In the Northwest Territories, a

wilderness area more than onethird the size of the United States, people fear that efforts by conservationist groups to halt the fur trade will undermine their traditional way of life and bring problems ranging from economic hardship to a rise in frustration

The prospect has sent a collective shudder through Rae, a pre-dominantly Dogrib community on the Great Slave Lake. It survives on government handouts, seasonal firefighting, hunting and trapping.
"I don't want to even talk

about it," said Joe Rabesca, chief of the Dogrib band at Rac.

Phillip Husky with marten pelts from his trapline.

around. They don't know any exported more than \$2.2 million other way of life." exported more than \$2.2 million ries. "There'd be very little worth of sealskins a year.

Canada claims to be the world's largest producer of highyear or more. This dependence on wildlife has created a euphemistic vocabulary in which animals are 'renewable resources" that are "harvested" for food and profit.

About 80,000 to 100,000 Canadians live by trapping and hunting. Many are Dene or Inuit. as Canada's Indians and Eskimos call themselves. They are especially vulnerable to a fur boycott because they often have no other

Two-thirds of the population of the Northwest Territories, ways been in tune with the land, about 33,000 people, live off the land, said Nellie Cournoyea, minister of renewable resources in the canital Yellowknife.

The fears of the trappers were touched off by the success of conservationist groups such as Greenpeace in stopping the bludgeoning of baby seals. Although

Total annual income from sealing in the northern arctic commuquality furs. Its fur industry has nity of Resolute reportedly fell been estimated at \$450 million a from 54,000 Canadian dollars to 1,000 dollars in 1983.

to halt hunting and trapping are perceived as affluent city dwellers with no comprehension of the age-old relationship between animal harvest and harvester.

"I think that they forget that we exist as people on the other traps are hard to set and imprac-side," said Nelson Green, an Inuvialuit from Paulatuck on Canada's northern coast. "We have to feed our families, but we've also we know what can be taken.

The trappers say they waste almost nothing of the animals befamilies or sled dogs. "What most people don't un-

derstand is that most of the animals taken for fur are also used for food," said Jim Bourque, a the campaign centered on New- former trapper who is now depu- said Cournoyea. "They don't "There's just too many people foundland, it all but wiped out ty minister of renewable re-and not enough work to go Canada's sealing industry, which sources in the Northwest Territo-defend themselves." foundland, it all but wiped out ty minister of renewable re- even understand why they should

mals killed even if there were no market for the fur, he said.

Canadian provinces have started trying to defuse the controver-000 dollars in 1983. sy over traps that critics say are in the Northwest Territories, cruel. British Columbia banned people from the south who want most uses of leshold trans. Ontario may follow suit.

But trappers in the Northwest Territories have balked at switching to off-set traps, which kill an nimal instantly in mousetrap fashion. They claim that such traps are hard to set and impracanimal in winter.

The Dene and Inuit formed an alliance with indigenous people in Alaska and Greenland last year to defend the harvesting of wildlife. But the coalition, Indigenous Survival International, has cause the meat is eaten by their had little impact because trappers and hunters are unused to presenting their case in public.

They don't understand, they don't have the money, they don't know how to defend themselves,"

PEOPLE

Hefner Admits Stroke A day after Hugh Hefner's in New York until 1981. Then, in

man of Playboy Enterprises had had a stroke. Hefner said he had recovered from a mild stroke and blamed the ailment on stress democracy to Spain. caused by a book by the film director Peter Bogdanovich about the murdered Playmate Dorothy Stratten. "I suffered a stroke two weeks ago," Hefner, 59, said in a statement issued by the Playboy spokesman, Don Rogers. Stratten's hus-band, Paul Soider, killed himself and his 20-year-old wife in 1980 after reading her memoir about her affair with Bogdanovich. Last year Bogdanovich published a book about Stratten. "The Killing of the Unicorn," which Rogers said con-tained veiled statements blaming Hefner for her death. Bogdanovich said after Hefner's statement was released: "Confronting Hugh Hef-ner with the reality of his life, and in particular what he and his magazine do to women, apparently is something he can't face."

With a stirring rendition of the Mass in B minor, Leipzig has launched its tricentennial tribute to Johann Sebastian Bach at the Gothic church where he served more than 20 years as cantor. Hans Josephinz Rotzsch, musical director of St. Thomas Lutheran Church, directed the two-hour performance. About 1,600 Bach lovers crowded into the church for the evening performance by a 50-member orchestra, the 88-member St. Thomas boys choir and four East German soloists, including the ten-or Peter Schreier. п

Delegates headed for U. N. Security Council debates reportedly will soon be confronted by a reminder of the horrors of war: a tapestry of Picasso's "Guernica." Sources said the tapestry, owned by the late Nelson A. Rockefeller and woven under Picasso's supervision, would be loaned or donated to the United Nations by Margaretta (Happy) Rockefeller, widow of the former U.S. vice president. The tapestry hung in the executive mansion in Albany while Rockefeller was governor of New York. The organizing a retrospective exhibition on Yves Saint Laurent May 1937 painting itself, a protest against the bombing of the Basque through July 14, with about 21-town of Guernica during the Spandesigns from 1958 to 1985, at it. town of Guernica during the Span-

spokesman denied that the chair- line with Picasso's wishes, the painting was turned over to the Prado museum in Madrid after the

death of Franco and the return of democracy to Spain. Patricia Hansen, wife of the Rolling Stones guitarist Keith Rietards, has given birth in New York to a baby girl, Theodora Durree Richards. Hansen, a model, delivered the 7-pound. 15-ounce baby by natural childbirth with Richards, 41, assisting. It was the firm child for the child

child for Hansen. Richards has two children, Marlon and Angels, by his former wife, Anita Pallenberg.
